modern design

Modern design is an increasingly popular direction for decorative drapery hardware. Condos and lofts, minimalist window treatments, bright open spaces... all characteristic of today's effortless yet graceful lifestyle. Mirror chrome is the perfect finish for these contemporary, unadorned finial designs. They are light and bright adding that special gleam to accent the simplicity of the overall décor. For a more subtle effect, choose modern design distinctive drapery hardware in matte finish plated pewter. Several finials in this collection are also available in many of the standard Curtains Up® finishes. The modern design collection is fresh yet classic, sophisticated and universal.

Curtains Up® clear acrylic finials have been fashioned in two of the most timeless yet versatile designs: the Pineapple finial (fits both 1" and 1½" rod) and the Ball finial in two sizes (to fit 1" rod and 1½" rod). Premium acrylic offers the luxurious look of crystal but with substance and durability.

The latest finial, endcap, rosette and tieback designs refresh Curtains Up® resin collection. All are available in eight classic painted finishes.

Curtains Up® now fabricates the ever popular metal Pineapple and Mission finials to fit a 1½" rod.

Stained wood decorative drapery hardware has been a significant part of home décor for many years. Curtains Up® new collection offers two stained finishes - honey brown (207), and chocolate (209). This collection meets the needs of traditional, country and urban settings by offering five elegant finial designs. All essential components including rods, rings and brackets are available to match the finials. A sturdy wand, tiebacks and endcaps complete the collection. The wood finishes are hand applied on solid wood cores leaving the distressed signs of natural wood present. This creates a handsome organic look which will enhance any window treatment.

- 45...BURNISHED SILVER
- 48...CHESTNUT
- 59...BLACK

Curtains Up® offers traverse rods in coordinated painted finishes in 1" and 1½" diameter for those challenging installations where an unobstructed flow of curtains is needed.

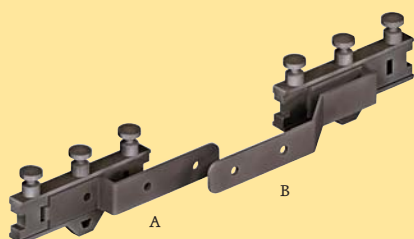

These traverse rods are available in painted finishes to match most finials and accessories.

Using top mounted brackets you can install lengths of 8' or more without brackets interfering with the curtain flow. Top mounted brackets are first attached to the wall. Then the traverse rod is connected by tightening the Hex head screw (key supplied) to lock the rod in place. Rods can be connected for greater length as needed.

A fling rod is recommended for use with glides and master carriers for ease of operation and minimum curtain wear. A large roller glide is suggested for the 1½" diameter rod as it easily handles heavier treatments. A smaller nylon glide fits with both size rods for use with lighter weight curtains. Master carriers with either overlap or standard arms are available. The direction of each arm is adjustable to either a left or right orientation.

Curtains Up® finials that fit over 1" or 1½" diameter rods will lock onto the new traverse rods. If a screw-in finial is selected, simply install the plastic plug into the end of the 1½" traverse rods.

Please note that screw-in finials are not offered for 1" diameter rods. End stops are available to hold the curtains in position at either end of the traverse rod.
